SILICON SOLAR SCIENCE SYSTEM

BOOM ANGLE SENSOR

BOOM ANGLE SENSOR: AS-100

The Angle Sensors AS-100 has a pendulum driven potentiometer, which records the Angle of the boom to the horizon. This system is integrated into a robust housing suited for rough environments. In order to dampen vibrations, the housing is filled with oil. The frictionless bedding of the potentiometer and its quality guarantee high precision.

SPECIFICATION:

Sensor Endless Variable
Maximum Angle 0.0 - 90 degree
Size 175 X 165 X 85 mm
Weight 5Kg
Steel Body

BOOM ANGLE SENSOR

JAPANESE TECHNOLOGY MADE IN PAKISTAN

DEALS IN : ALL KINDS OF ELECTRONIC APPLICATIONS AND COMPUTERS
